DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Objections

2. Claim 1 is objected to because of the following informalities: the term "cab" (final line) should be "can". Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 3, 4, 10, 11, 17, and 25 - 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With regard to claims 1 and 29, it appears that Applicant intends to set forth a Markush group. However, the claims improperly recite "the group of" instead of "the group consisting of".

Claim Rejections - 35 USC § 102

5. Claims 19, 20, 22 - 24 and 31 are rejected under 35 U.S.C. 102(e) as being anticipated by Imran et al. Applicant's attention is drawn to Figures 3A, 3B, and 4 and the descriptions thereof in paragraphs [0083] - [0097].

Claim Rejections - 35 USC § 103

6. Claims 19 - 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marshall (USPN 6,632,175 - previously cited) in view of Imran et al. Marshall teaches a swallowable capsule that includes a sensor and ultrasound telemetry elements to

Art Unit: 3735

transmit the measured data to an external location (Figures 1 - 3; column 3, line 39 - column 6, line 6). Marshall teaches all of the features of the claimed invention except for the particular details of the ultrasound transceiver. Imran et al. teach a capsule for similar purposes to that of Marshall that includes three ultrasound transducers (136a-c) for providing omni-directional transmissions to an external location. It would have been obvious to one of ordinary skill in the art at the time of the invention to implement Marshall with the ultrasound transducer arrangement of Imran et al., since Marshall requires an ultrasound transducer and Imran et al. teach one such arrangement.

Allowable Subject Matter

7. Claims 1, 3, 4, 10, 11, 17, and 25 - 30 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3735

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
